Google Cloud

Everything you need to know about Google Cloud product icons.

This resource provides the corresponding icons for each of our Google Cloud products.

Some of the icons you find in this guide may seem new as we rolled out a new product icon system in early 2025. The new icon system is comprised of unique icons for our core products, and general category icons for our general products.

Learn more about it on the [following page](#).

Please note!

The Google Cloud console is still being updated to reflect this new icon system. However, the [2-tone blue icons](#) in console will be deprecated by the end of 2025.

The new Google Cloud product icon system

In early 2025, we overhauled all of our Google Cloud product icons, greatly simplifying our system from over 250 unique icons to ~40.

Now, you'll find two icon formats:

- [Unique core product icons](#) (4-color)
- [General product category icons](#) (2-color)
