

Unified Ecosystem

One Illustration Core, Multiple Targets

FULL CANVAS STAGE — 1920 × 1080 PURE DRAWING STAGE

Drawlib unifies engineering documentation and technical visualizations as version-controlled code:

Target	Command	Output	Primary Use Case
Standalone Images	<code>drawlib build image</code>	PNG, WebP, PDF	README graphics, blog posts, whitepapers
Documentation Site	<code>drawlib build html</code>	Static Web Site	Technical specs, API references, architecture docs
Document Book	<code>drawlib build pdf</code>	Merged Vector PDF	Formal RFCs, architecture books, print designs
Presentation Deck	<code>drawlib build slide</code>	HTML Slide Deck	Conference talks, design reviews, team pitches

```
# Initialize a new presentation project with Google styling
uv run drawlib init slide -s google

# Build presentation slides
uv run drawlib build slide slide_src/ -o slide/

# Start interactive preview server
uv run drawlib serve slide/
```

- Call pure Python functions directly inside `::: block` containers
